

# Twin Feeding Cushion Dimensions

Measure the cut-out to fit mother's waist width and choose a depth that is comfortable.

## Note:

- Thickness of rubber can vary depending on mother's sitting height.
- The cut-out makes a great lower back support cushion.
- The shape of the front of the cushion can be modified (to have a curved edge)
- Either a home-made vinyl cover or a waterproof sheet for hygiene is recommended for feeding.
